

## Solving problems in science!

On June 14, 2019, Sh.Imomov, Head of the Department for Research, Innovation and Training of Research and Teaching Personnel, together with the staff of the Department for Commercialization of Research and Innovation and the Department for the Organization of Research and Development of Gifted Students, held a meeting with a group of gifted students of the Faculty of Water Management farms. During the meeting, a direct dialogue was held with students. S.Imomov spoke about innovations, innovative ideas and special attention of our president to young people. Turning to the students of the faculty, he got acquainted with their problems and suggestions. It was noted that open meetings with gifted and initiative youth will stimulate and increase their interest in science.
