

## Cooperation with schools

Today, on January 15, professors and teachers of the department "Geodesy and Geoinformatics" O.Rozikulova, S.Khikmatullaev, A.Juraev organized an open lesson on "Orography of Uzbekistan" in Geography at school No. 150 in Tashkent. The open lecture was opened by the principal of the school Aripova Komila Karimovna, who listened to the questions of the children until the end of the lesson. At the beginning of the lesson Associate professor O.Rozikulova asked students the name of 2021. They responded with one voice that it was the Year of Youth Support and Public Health. Then the students answered the question "Who do you want to be?": doctor, teacher, builder, master, craftsman. It was then emphasized that the student's abilities and interests were crucial in choosing a career. There were given advice the necessity of setting the goal and moving forward towards the aim. During the lesson, teachers of the department conducted interesting questions and answers among students.

The winners were presented with cards and atlases. In addition, the assistant teacher A. Juraev provided information on the activities of the Faculty of Land Management and handed out booklets to all students. It describes in detail the activities of the faculty and areas of study. In order to guide high school students to the profession, information was provided about the existing bachelor's and master's specialties at our institute. The students were impressed by the Tashkent relief-landscape globe. At the end of the lesson, students received answers to their questions.

At the end of the meeting, the students and the head of the school thanked the teachers of the Department of Geodesy and Geoinformatics for the open lessons with the students and invited them to meet with the graduating class next time. The teacher of the department S.Khikmatullaev proposed to organize interesting inter-class competitions in geography and to participate in the competition as a judge. O.Rozikulova invited students to the "Young local historian" circle after class. This proposal was welcomed by the students. Geography teacher Normammedova Shakhnoza Khusnitdinovna gave advice on pedagogical technologies in working with children. According to the agreement signed between the school No.150 of Yunusabad district and TIAME, scheduled contacts with schoolchildren will be continued. Professors and teachers of the Department of Pedagogy of the Institute provided distance learning to 5 teachers of the the school in pedagogical master classes.
