

## The power of theory and practice

According to "5 + 1 system" the 1st year students of "Energy supply in agriculture and water resources" together with the associate professor of the department "Electrical technology and use of electrical equipment" T.Bayzakov get acquainted with Electrotechnical materials, electric lighting and electrical technology located in the educational laboratories, E block of the institute. Practice is a means of preparing students for progress and life. In this laboratory, students got acquainted with all the laboratory equipment and received answers to their questions.
