Project "One Million Uzbek Programmers"

On March 15, 2021, the teaching staff of the Department of Information Technologies organized a seminar training within the framework of the "Uzbek Programmers" project with the participation of the head of the Department of Educational Projects (IT-Park) Dilmurod Nasibullaev.

The seminar was attended by talented students of the faculties of organization and management of water resources and land management. The seminar provided detailed information on the goals and objectives of the "Million Uzbek Programmers" project, the benefits of participating in the project, including free access to the international online education system Udacity.
