

Visit to the Center of Cartography

On May 1-2, 2019 students of the 10th, 11th and 12th years of the Military Department of the TIIAME got acquainted with the production process in the Cartography Center of the Ministry of Defense.

Lieutenant Colonel Ashurov F., head of the cartography center, welcomed the students and reminded them of the security measures in the center and started the event.

Lieutenant Colonel Ashurov F. briefed the students on the history of the center, according to the information that the center was founded in 1921 and has nearly 100 years of rich history, and until now the Armed Forces has been providing accurate high-quality topographic cards supply.

Modern software used in the creation and editing of electronic digital maps (GIS Panorama, Arc GIS program) attracted great interest of students, and they tested themselves to practice the theoretical knowledge gained at the military department.

The process of preparing the maps is also carried out with the use of modern technology in newly acquired cartographic techniques. In this process, the students using EccoGrophix technology directly from the computer were amazed by the students.

The same day the students went to the Cartography Center. The students returned to the military department with excellent abilities.

R.Jumaniyozov, the press secretary of the institute
