

Lessons based on 5 + 1 program at a manufacturing plant

"Tractors and Automobiles" Department of the Institute plans to hold classes on Tractors and Vehicles for 3rd year students of "Agricultural Mechanization" faculty "Use of innovative techniques and technologies in agriculture" specialty. On September 15, the classes were conducted by the chief specialist of the joint venture Babaev H.M. and assistant of the department Khudoykulov R.F. in "UzKlaasAgro" classroom.

Students were given an initial introduction to the company's tractors and agricultural machinery and the innovative solutions used in them. The course covered the history of tractors and the requirements for tractors. The students said that they learned useful information from the course organized by the production company. Classes based on the 5 + 1 program are planned to continue throughout the semester.
