

Wonderful results

The "TechnoWays" technological development marathon, organized by the Ministry of Innovative Development of the Republic of Uzbekistan with the aim of developing the skills of youth to work with start-up projects and invest in project financing has come to an end. Within the framework of the marathon, innovative projects of about 100 teams from universities of the republic were considered, and 27 teams took part in the final stage, 12 of which were recognized as winners. The highest result among the teams was achieved by the team of hydroleaders of the Faculty of Hydromelioration. For the purpose of further development, the project received financial support in the amount of 30,000,000 soums. It should be reminded that L. Samiev, the scientific leader of the hydroleaders #Smart_DIS #GidroPower team took part in the marathon.
