

Collaborative activity to increase the effectiveness of teaching technical sciences

In the framework of the cooperation agreement signed on September 12, 2017 between Tashkent Institute of Irrigation and Agricultural Mechanization Engineers and Chirchik Higher Tank Command School, T.U.Apakkhujayeva, Senior Lecturer of the Department of "Hydraulics and Hydroinformatics" and D.E.Atakulov, assistant teachers visited the Department of "General Engineering" of Chirchik Higher Tank Command School on December 12, 2020 and held an event with professors and cadets. The main topic of the event was "Improving the effectiveness of teaching technical sciences." During the roundtable, T.U.Apakkhujayeva spoke about the application of her research work in the educational process, the work carried out in the educational process, the new requirements for the creation of textbooks, the use of computer programs in creating virtual laboratories. D.Atakulov informed about the laboratory works at the department of "Hydraulics and Hydroinformatics" and noted that the professors and cadets of Chirchik Higher Tank Command School can take part in virtual laboratory lessons. In addition, T.U.Apakkhujayeva conducted a demo lesson on "Modes of motion of fluids", D. Atakulov on "Hydraulic calculation of short and long pipes". At the end of the meeting, professors and teachers of educational institutions expressed their views on the importance of developing measures jointly to further develop scientific cooperation and increase the effectiveness of education.
