

What Do Masters Do in Student Dormitories?

This question was in the spotlight of Vice-Rector for Youth Affairs R. Choriev and deans of all faculties who visited the campus today.

As it is known, the dormitories of our institute were renovated and put into operation at the beginning of the current academic year.

In the framework of five important initiatives to improve the spirituality of young people and meaningful organization of their leisure, put forward by our President Shavkat Mirziyoev, a number of works are also systematically carried out at SD. In particular, about 40 undergraduate students fully and effectively use all the opportunities created at the SD4. There are good conditions for their activity and effective use of their free time. There are software such as ArcGIS, AutoCAD, remote sensing, 3DMax in the room equipped with modern computers. In addition, students who are certified with IELTS in English provide foreign language courses for their peers. Vice rector for Youth Affairs R. Choriev and deans of all faculties visited the computer room and asked interesting questions about the computer programs used by undergraduates, discussed the ways of presenting research results in computer programs and their publication in reputable foreign scientific journals.

During the visit, our teachers also visited the standard rooms and studied all the conditions. According to the results of the study, the 5 most prestigious rooms were awarded with diplomas and memorable gifts.
