

Where there is cleanliness, there is blessing

Cleanliness is distinctive feature of our people. Where there is cleanliness, there is blessing and fertility. On April 17, 2021, at the Faculty of Agricultural Mechanization was organized Ecology and Cleanliness Day. The territory, sidewalks and ditches around the faculty were cleaned and poured with water. The trees were also whitewashed and pruned. The teaching staff of the faculty took an active part in Ecology and Cleanliness Day.
