

A field trip

For 412, 412a, 412b group students of "Water management and melioration" direction of the Faculty of Hydromelioration and students of 407, 408, 409 groups of "Ecology and environmental protection" direction of the Faculty of Organization and Management of Water Resources, teachers of the department Radkevich M., Abdukodirova M. and B. Nasibov organized a field trip on the topic "Sewerage and wastewater treatment" at the Salar station of treatment facilities.

The students got an idea of the sewerage system, which includes physicochemical and biological facilities for wastewater treatment. Today it is important to protect water bodies and the environment, as well as address the problem of water scarcity.
