

Scientists from prestigious universities in Japan

On May 4 and 10, 2021, Professor of Kyoto University, Deputy Head of JICA in Japan, Kenji Tanaka, Professor of Tottori University Toderich Christina, Professor Chiba University Higuchi Atsushi and assistant professor at Kyoto University Khuzhanazarov Temur, visited TIIAME to discuss the main parts of the SATREPS project, in cooperation with research organizations. 10 prestigious universities in Japan and 6 universities in Uzbekistan. After the presentation, they discussed main issues on the agenda.

It was decided to lead the research work in Kashkadarya region within the framework of the SATREPS project and to lead the irrigation and drainage section, which is the third component. It was also decided to participate as a partner in the study of component 1 - satellite meteorological data, component 2 - studies of hydrodynamics and water resources and component 5 - "breeding halophytes".

It was agreed that the Ministry of Innovative Development will be involved in the project. The ministry will fund research of Uzbek scientists.
