

Attracting students to innovative inventions

Our institute continues the campaign to attract students to scientific and creative work. On September 13, 2019 at the Faculty of Mechanization of Hydromeliorative works with the employees of the department of scientific research, innovation and training of scientific and pedagogical staff, the department of commercialization of scientific and innovative developments, as well as the department of research work of gifted students, a meeting was organized with students of the 3rd course at 10:40 and with 1st year students at 15:40.

Students were provided with information on how to write scientific articles, engage in scientific work, and participate in innovative competitions. Students were presented with new models of innovative developments of talented students. The meeting turned into a sincere. Also it was mentioned that a group was created in the Telegram (scientific department https://t.me/tiqxmmi_ilmiy_innovatsiy). We invite all students and teachers to cooperate.
