

Digitalization is the fruit of our future (demand of the time)

At the suggestion of our Rector O.P Umurzakov, at Tashkent Institute of Irrigation and Agricultural Mechanization Engineers has been held a meeting with Firdavs Nematzoda Nematovich, who introduced and created robotics first in our country, which now operates at the Ministry of Innovation and Development.

At the meeting, it was agreed organize courses based on based on the interests of students. At the initiative of the rector of our institute, the Ministry of Innovation also raised the issue of establishing a robotics programming circle. In the coming months, gifted students will have the opportunity to study for free.
