

New Uzbekistan - starts from the school gates

In recent years, in order to comprehensively develop the country and build a new Uzbekistan, radical reforms are being carried out in the education system too. Today, it is important to radically reform the education system, especially in schools.

On March 17, 2021, teaching staff of the Energy supply of agriculture and water resources faculty, Baratov R.Zh., Shoyusupov Sh.A., Chulliev E.E., Pardaev A.I., Begmatov M.T carried out career guidance work with students of the grade 11 of secondary school No. 41 of the Urtachirchik district. They told the students about the faculties and directions of education at the institute, in which organizations and companies graduates of our institute can work.
