

Discussion of a dissertation on an important topic

It is true today that in a country where science is highly valued, there will be progress. That is the consequence of an interconnected world. " In the same sense, under the leadership of our President, there is great wisdom in the integration of science, theory, practice, and production. There are many issues related to the development of the country. However, issues related to the core issues of the education system play an important role in all aspects. It is not a question of how the subject is, but how the subject matter is covered and explored. The level of professional education must be high. Because it is a criterion for the development of the country and the prosperity of the state. That is why this topic is always relevant. It is no exaggeration to say that vocational training, especially on the basis of the dual system, is the core and essence of the industry.

Such an important and topical dissertation discussed at an extended meeting of the Department of "Pedagogy, Psychology and Teaching Methods" at the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers on August 18, 2020, through the ZOOM platform. The agenda of the meeting included the Vice-Rector for Youth Affairs of the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers, Candidate of Pedagogical Sciences, Associate Professor, Independent Researcher of the Department of Pedagogy, Psychology and Teaching Methods Ruzimurat Kungratovich Choriev 13.00 .05 - The discussion of the dissertation of the Doctor of Pedagogical Sciences (DSi) on the specialty "Theory and methods of vocational education" was lively on the theme "Improvement of methods of preparation of training professional education specialists on the basis of Dual system" in the specialty.

The discussion was attended by professors of Tashkent State Pedagogical University, Tashkent State University of Economics, Andijan branch of Tashkent State Agrarian University, Jizzakh Polytechnical Institute, employees of the Surkhandarya Regional Department of Secondary Special Vocational Education, and experts in the field. Doctor of Pedagogical Sciences, Professor Z.K. Ismailova, as a research supervisor, gave a well-founded opinion on the process of coverage of scientific work and the essence of the subject matter of the research object. Vice-rector of the institute Tohir Sultanov noted that there is no doubt that this work will make a worthy contribution to the methodology of pedagogical education. Also, on the discussion of the dissertation professors Sh. Uljaeva, M. Hakimova, N. Isakulova acted as reviewers, A. Isakov, Sh. Abdullaeva, R. Salomova expressed their positive opinions on the dissertation and dissertation.

During the discussion, experts positively commented on the doctoral dissertation prepared by researcher R. Choriev. The reviewers recommended to take the dissertation to the next level.

The success of the dissertation today is not accidental, but it still has a solid scientific foundation. His nearly 200 published articles, several monographs and methodological manuals are proof of this. Not to mention that in the education system, as a researcher with intellectual potential, more than 20 researchers received PhD and doctoral degrees, and his initiative and it is not fair to say that he has organized several national and international scientific conferences.

It is clear that the success of the "SHUHRAT" medal winner, experienced educator, scientist and senior specialist R. K. Choriev is due to his scientific potential and high talent. Most importantly, there is a certain consistency and logic between his research work and the chapters and sections of his dissertation. We, as colleagues and teammates, are proud of the fact that the dissertation has fully achieved its scientific goal and has been positively evaluated by all experts and officials in the field.
