

## Kaykovus: "The best of all abilities is speech." (From "Kobusnoma")

As you know, the "open lesson" program was translated last Sunday on "Yoshlar" channel. Deans and assistants of all faculties and talented students took part in it. The quality and effectiveness of education depends on the communicative competence of the teacher.

The educational system demanded by our President is the commitment of teachers and students to the freedom of expression.

This is also reflected in the speech of President Shavkat Mirziyoev on 21 October "On measures to enhance the prestige of the Uzbek language as a state language", December 27 at a meeting with the youth at Muhammad Al - Khorezmi School of Art.

By translating this program we hope that youth will recognize the validity of the above comments.
