

Theoretical knowledge in practice

Department of Hydromelioration Systems Operation for students of 307th group of education direction "Innovative technologies and their use in the water sector" of the Faculty of Hydromelioration organized educational practice in the Scientific and Training Center of our Institute, which is located in Urta-Chirchik district of Tashkent region. Bakhodirjon Amonov, Associate Professor of Hydromelioration Systems Operation Department, was appointed as the supervisor of the practice, which will take place within two weeks.

He started by introducing water-saving technologies created within the framework of the UN Development Program and the European Union Program for Sustainable Rural Water Management in Uzbekistan. The practicum supervisor told the student about modern methods of irrigation, in particular drip irrigation, using concrete facts and practical examples.
