

Training courses in AutoCAD and Google SketchUP are organized.

A one-month free training course on the use of AutoCAD and Google SketchUP in collaboration with the international DSinGIS project was organized for children from families who study at the Land Management Department who need social protection and assistance and whose families are included in the "Iron Book". 18 students who successfully completed the course were awarded special certificates in the presence of the dean of the faculty and the head of the State Cadastre Department K. Rakhmonov. Classes in the training (course) are led by Sh. Ismanov, a doctoral student at the Department of State Cadastre.
