

Investment is a a beneficial factor in socio-economic development

On September 18, 2021, Muazzamov Akmal Akbarovich, Deputy Director of the Center for the Investment Coordination and Project Management of Turonbank JSCB, made an impressive presentation at the Center for Innovative Research of the JSCB Turonbank. A pleasant event for the participants of the seminar was that Muazzamov Akmal graduated from our institute in 2017 with a degree in Accounting and Audit. During the seminar, using specific examples, the work of JSCB "Turonbank" on the development of lemon and sheep breeding in our country was presented as well. It was mentioned that in recent years the bank is paying a great attention to the development of floriculture in our country. At the end of the seminar there was organized a question-answer period for having hot discussion. The even was very interesting and, most importantly, very useful for professors, doctorate students and active students of our faculty. ❌
