Academic year 2016-2017.

Master student: M.SHaropov

Produce safety puncture measures For use Kattaqorgon water reservoir.

## ABSTRACT FOR MASTER'S DISSERTATION

Height of scientific work: Nowadays there are 55 water reservoirs in republic of Uzbekistan. There are accompanying defects in some of these constructions, especially accompanying muds flow down and result of this problem makes some reasons that water reservoirs usefulness is diminished. It makes some injuries that delivery society and trust worthy of constructions of water reservoirs and clean muds which flow down and restore of water reservoirs useful types.

Aims and tasks of the research. Technical condition of constructions of Kattaqorgon water reservoir and learn their defects perfection and trust worthy for work. Water conductor construction work conditions of Kattaqorgon water reservoirs. Find their defects their safety and trust worthy and produce new recommends.

Subject of research. Kattaqorgon water reservoir situated in Samarkand region Kattaqorgon district, Dan and water producer, water coop construction of water reservoir.

Types of research: Result of held research constructions defect accompanying in water reservoir.

Composition and structure of work: Entering to describe topic work, the main part hors typically, conclusion, using bibliography list and postscript.

Final results of works : Find the defects of constructions and in this way they safety and trustworthy work be necessary repair in water reservoir

Conclusions and offers : Result of Field research in Kattaqorgon water reservoir construction and in use these constructions Find defects and learn. Analyses of formation constructions and produce safety and trustworthy for work .
