

My Future Profession s my pride

It is known that any type of occupation - a type of human activity, permanent occupation; knowledge, skills, experience are required, allowing to competently perform this or that type of work. As one great writer put it, "Choose the career that you enjoy the most in life and you will get a job of a lifetime. Occupation - a type of human activity, permanent occupation; knowledge, skills, experience are required, allowing to competently perform this or that type of work. As one great writer put it, "By choosing the career that you enjoy most in life, you will not work your whole life." If a person works in his favorite profession, he will never think that he will work every morning. Doing what you love brings you joy, happiness, courage, motivation and spiritual nourishment. A person who is doing what he loves does not notice how quickly time passes, he never gets tired of what he is doing. If you are choosing a career for your future career at this age, consider not only the material income that this profession will bring you, but also the spiritual nourishment that you will receive from it. profession. Only then will what you do will become your real favorite profession! On June 21, 2021, assistant of the department "General technical sciences" B. Dzhuraeva visited the "Karshi Academic Engineering and Economic Lyceum" and talked about choosing a profession and career guidance when entering higher educational institutions. students about the creation of the Karshi branch of TIQXMMI, the existing faculty, departments, existing areas, specialists, student life, conditions created for students, conditions in classrooms, consumer services, gave detailed information about the credit-modular system, the system of organizing educational and industrial practice, trainings , the process of organizing clubs.

Information of the assistant of the department "General technical sciences" Zhoraev B.
