

The month for Ethics for students of TIAME

It is interesting to note that the dean of the faculty "Management of Land Resources" PhD Sh. Narbaev, deputy dean for Youth affairs Kh. Eshova, head of the department "Land use" A. Altiev and professor-teachers of the department also took part in the event. If an applicant enters our institute and becomes a student, he or she becomes our child. So, we are responsible for the education of every student. In fact, a spiritual event was organized the previous day in the hostel # 1 of "Land cadastre" department. A round table on the topics "Ethics" and "Socio-psychological dialogue" was held with them. ❌

During the discussions, they created a healthy spiritual and socio-psychological environment in the minds, which was very useful for each student, studying at the educational institution. The need to preserve the prestige of educating students, that meet the highest moral and ethical standards, and above all, to comply with the rules of etiquette was also emphasized.
