

## VISIT OF INTERNATIONAL CONSULTANT TO THE INSTITUTE

In collaboration with the United Nations Development Program (UNDP), the Global Environment Facility (GEF) and Davergeodezkadasthr Committee, the "Comprehensive exploitation of irrigated arid land in mountainous, semi-desert and desert landscapes of Uzbekistan Max Kasperek, the international consultant of the Federal Republic of Germany arrived in Tashkent for an official visit to the Ministry of Emergency Situations of the Republic of Uzbekistan to familiarize with the implementation of the project "Reducing the use of natural resources."

During the visit, along with general information about our Institute, detailed information on the activities carried out within the UNDP project was provided. As a local consultant, prof. A.S. Chertovitsky, the active participant of the project, dean Sh.K.Narbayev and the head of the center R.Oymatov highlighted the positive developments in the work of the TIAME.

With the help of this project, the newly acquired new equipment was introduced in the newly created Center for Remote Sensing of the Structure and Description of Land in Different Landscape of Uzbekistan. International consultant Max Kasperek made a good impression on the results of the project and went to the next organization.

The press secretary of the Institute, Rakhimboy Jumaniyazov
