

The seminar-training seminar on the topic "The role of the professor-teacher in "Higher education management information system - HEMIS".

It is worth mentioning that there were a number of useful speeches on the videoconference "On the effectiveness of reforms in higher education and the process of preparing for the new academic year", held on June 16, 2021 under the chairmanship of the President of the Republic of Uzbekistan Sh.M. Mirziyoev (23-section). In order to ensure the implementation of the order of the Ministry of Higher and Secondary Specialized Education of the Republic of Uzbekistan No. 372 dated August 26, 2021 as part of the "Higher Education Modernization" Project with the participation of the World Bank. The implementation of "Higher education management information system - HEMIS" at Tashkent Institute of Irrigation and Agricultural Mechanization Engineers there was organized a training seminar on September 21, 2021. The seminar was opened by the Vice-Rector on Academic Affairs B.A. Khudayarov and with the Institutional order of the Institute, dated September 7, 2021 No. 376 on the implementation of "Higher education management information system - HEMIS" at our institution. The deputy head of the educational and methodological department F.Kh.Shafkarov informed the professors and teachers of the faculties about the formation of educational resources, about the connection of control questions in the lessons of natural science, the systematization of control tasks in the classroom and the assessment of results. Constantly the results of your student's participation at the lessons, including course and attendance, which are linked to the Lesson's menu on the information system.

Formation of the results of the current, mid term and final control of students by the relevant subject included in the "Control" menu of the information system, drawing up a list of exams, tasks and monitoring the results. The scientific and methodological work of the information system, published by the teacher, related to the "Scientific activity" menu, demonstrated the process of entering intellectual property documents and data on scientific activity in international systems directly into the information system "HEMIS". During the event all participants could receive the answers to their questions.
