

The implementation of theoretical knowledge is the educational practice

As the poet admits, each season has its own charm and dignity, just as each semester has its own requirement. At Tashkent Institute of Irrigation and Agricultural Mechanization Engineers the 3rd year students of the faculties "Mechanization of irrigation and drainage works" and "Construction of hydraulic engineering" organized the event on the subject of "Engineering geodesy". 

The internship began in the period from October 18 to October 30, 2021, outside the working hours at the institute and in the city of Tashkent in accordance with the quarantine rules. The purpose of the internship is to help students in the future become professionals in their field and master modern geodetic instruments.

Information of Abdulla Dzhuraev, teacher of the department "Geodesy and Geoinformatics"
