

Scientific work is going on

In accordance with the signed agreement with the Ministry of Innovative Development of the Republic of Uzbekistan KX-A-KX-2018-297 to carry out practical work on the project plan for 2020 on the topic "Development of hydraulic modules and scientifically based procedures for irrigation of irrigated lands of Khorezm oasis (southern districts of Khorezm region) "Scientific researchers of our institute U. P. Islomov and I. K. Urazbayev visited experimental fields in the Republic of Karakalpakstan and Khorezm region.

During the visit, phenological observations of the growth and development of cotton, irrigation, groundwater level and mineralization were studied, and the necessary information was obtained from the experimental fields.

Information of the teacher of the department of geodesy and geoinformatics Utkir Islamov.
