

## Binary lesson

On February 24, 2020, Department "Mechanization of Hydromeliorative Works", the Faculty of Mechanization of Hydromeliorative Training for the 103 groups and the Ministry of Labor and Social Protection held a double course on the subject "Engineering Systems" by S. Kholova. 

Bahodir Rasulov, a specialist of the Ministry of Water Resources and the 2nd course of magistracy student of the Institute shared his insightful ideas on reforms and problems in the water sector with our young professionals. The real expert talked about what science potential is and what it needs to do today. The binary method, which is one of the forms of pedagogical skills, was interesting and full of questions.
