

The activities of students spent during practical hours

It is important to suggest that there has been approved by order of TIAME rector, dated May 29, 2021-553 "Energy supply in agriculture and water management" ,Faculty 5430500 "Energy supply in agriculture and water management" the second course students of groups 201, 202 and 203 "Technology of electrical equipment installation ", which is aimed at practice facilities on the basis of an agreement, concluded between the institute and industrial enterprises from June 7 to July 31, 2021 according to the schedule of the educational process for the 2020-2021 academic year.

The head of the Department of Electrotechnology and the Use of Electrical Equipment Berdishev A.A, Associate Professor of Department U. Khaliknazarov and assistant Sh. Yusupov were appointed as Operative Leaders, which will be responsible for students in conducting practical training in the specialty "Technology of installation of electrical equipment" at agricultural, water facilities and electrical networks. We believe that this internship will provide our students the opportunity to associate their theoretical knowledge with practical one, in manufacturing and to become qualified professionals in the near future.
