

Message from the President

On January 24, the Department of Irrigation and Melioration together with the Chairman of the National Agro products farm of Chirchik district of Tashkent region held a round table. The farm occupies 300 hectares of irrigated land and is based on cotton-crop rotation.

In 2019, the cotton fields were irrigated on the 47 hectares of the farm through a drip irrigation system developed in European country, Italy.

Currently, the company is going to sign a contract with Netafim (Israel) to design drip irrigation technology for irrigation of cotton fields on 90 hectares.

Jointly with this farming, is to be held Co-ordination of field experiments with professors, bachelors and masters in the field of "Development of Drip Irrigation Procedures for Cotton treatment" With associate professor of the Institute Ergashova Dilnara Tolybaevna was agreed on using magnetic water in irrigation.

The work program on these activities was presented to the farmer and further working sequences were agreed upon.

Information of Department of Irrigation and Melioration, prof. B.Sh. Matyakubov

Head of the Press Service of the Institute R. Djumaniyazov
