

Scientific view of young people on modern problems of agriculture and water management

On May 25, 2021, the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers hosted the opening ceremony of the traditional XX scientific-practical conference of young scientists, masters and gifted students on "Modern problems of agriculture and water management", which was organized online through the ZOOM platform.

At the beginning of the conference the rector of the institute U.P. Umurzakov told about the conference, about the development in the field of scientific and innovative research, about the increase of youth activity in this direction, noting that more than 700 scientific papers in 11 areas were submitted for participation in the conference. Then he wished success to the participants of the conference.

After that, the guest of the conference, Director of the Youth Agency of Uzbekistan, Senator A. Z. Saedullaev said that the prospects for the development of any society and country should be determined by intellectual young people conducting their research in science. Highlighting the ongoing projects and programs in support of the project, he called on young people to take full advantage of these opportunities and contribute to the further development of our country.

The deputy of the Legislative Chamber of Oliy Majlis of the Republic of Uzbekistan, Deputy Chairman of the Committee on Agrarian and Water Resources Kurbanov A.E. also wished success to all participants. He noted the work and achievements of specialists trained at the Tashkent Institute of Irrigation and Agricultural Mechanization Engineers.

Yangiev D.A., an El-Yurt Umidi Foundation scholar and a master's student at the University of Alberta, Canada, shared his experience studying abroad and participating in international grants.

The conference will be held on 25-26th of May, on-line
