

Implementing the five initiatives into the practice

It is important to mention that the third year students of faculties "Mechanization of irrigation and drainage works" and "Hydrotechnical construction" spend their free time in the appropriate way and intensively in industrial practice as well. On the basis of five important initiatives, Football and chess competitions were organized under the guidance of practicing teachers from two faculties. The football tournament began with a meeting of teams of faculties, and then continued with a meeting of teachers of secondary school in Akalta region as part of the leading players of teams of the faculty.

The first match was won by the team of State Historical Museum, and our team achieved the second place in the game with hosts. Phase 2 of the initiative continued with a mind-blowing chess game. In this regard, the chess players of both faculties once again proved that they have enough thinking and at the end of the competition, M. Berdiev, an assistant of the Department of State Physics and Science, conducted a master class for the students.
