

## Demo lesson on space geodesy

The teacher of the Department of Geodesy and Geoinformatics Islamov Utkir conducted a master class on the topic "Modern spacecraft and GPS receivers" for the 3rd year students of group 302 of "Geodesy and Geoinformatics" direction of the Faculty of Land Management. The practical lesson was organized in a modern computer class. During the lesson, students watched interesting videos on space geodesy. Students were active, and they received answers to all their questions.
