

## Innovative solutions to problems

✘ It is known that increasing the efficiency of water resources, introducing new innovative technologies in water supply and irrigation systems are currently one of the basic tasks that underway in our Tashkent Institute of irrigation and agricultural mechanization institute, which is responsible for all agricultural and water management organizations, research institutes and specialists. One of the important tasks facing the Institute of Agricultural Mechanization Engineers. The next issue of the program "Agroinnovation" aired on Uzbekistan TV channel, which was filmed on November 25, 2019 at the UzNBC Media Center was dedicated to this problem.

The representatives of the Ministry of Water Resources, the Research Institute of Irrigation and Water Problems, and the head of the ITI and IPKT Sh.Imomov, the lecturer of O and TIDW department A.Muratov, the lecturer of AM department A.Dusqulov, the head of E and RES department of the institute D. Kadyrov, and several doctoral, master and bachelor students participated during the filming. The roundtable was based on broad discussion of innovations, achievements and the current state of implementation, goals and objectives in this field.

Head of the Press Service of the Institute Rakhimboy Djumaniyazov
