

## Integration of education, science and industry

Manufacturing enterprises play a significant role in the lives of students so that they become highly qualified personnel in their fields in the future. In this regard, 4th year students of "Electricity (water management)" on the basis of "5 + 1" system under the guidance of the assistant teacher of the Department of Electricity and Renewable Energy Sources Kilichov O. visited the joint venture "Uzkabel".

Practical and laboratory classes were organized for students on the topics "Operation and maintenance of power grid equipment", "Transmission and distribution of electricity". The students also got acquainted with the laboratory equipment of the enterprise and received answers to their questions.
