

"A good rest is facilitates to work."

Amir Temur paid special attention to the construction of reservoirs, dams, digging ditches, development of new lands for the welfare of the people and the beautification of the country.

The team of professors, staff and talented and active students of the Karshi branch of TIAME traveled to the place where Temur was born and grew up - Shakhrisabz, visited historical sites, once again convinced that our people are masters in all areas and were proud of Timur's reign.

The trip to Shakhrisabz as a local tourist destination in our country undoubtedly inspires everyone to work in a way worthy of the great history, the great ancestors. There is a saying among our people: "A good rest is facilitates to work." We believe that, such events contributes in increasing the productivity of the staff and give students more energy to study.
