

Successful participation in an international scientific conference

Today, in the process of reforming, liberalizing and regulating electricity in the energy market, a number of features related to the economic benefits to consumers and the priority of electricity prices have been identified. In addition, in power supply systems, great attention is paid to important issues such as system safety and reliability.

The above problems and socio-economic and environmental issues and their solutions are organized by several universities of the Ukrainian state (1. (National University of Water and Environmental Engineering; 2. Kryvyi Rih National University; 3. Kryvyi Rih State Pedagogical University) The International Scientific Conference "ICSF 2020: The International Conference on Sustainable Futures: Environmental, Technological, Social and Economic Matters" was held on May 20-22 via the Zoom online platform. Tursunov Obid Bobokulovich, Professor of the Department of "Sources" with the report "Development of intelligent energy systems: the concept of smart grids in Uzbekistan".

Professor O.B.Tursunov presented his report. The strategic goal of this study is to analyze the development of the power sector in Uzbekistan, which will ensure the transition to a new stage of development of electricity in Uzbekistan through the creation of smart grid systems as a platform for management and technological innovation. It is noteworthy that the report aroused great interest among the participants and was rich in interesting questions and answers.
