

## "Let's unite! Let's build a new Uzbekistan together! "

On October 22, 2021, the female professors of the Department of "Hydraulics and Hydroinformatics" held a seminar with the girls at the SD No.4 "Let's unite! Let's build a new Uzbekistan together! " During the roundtable, Associate Professor T.Apakhujaeva stressed the need for girls to work, study together, and contribute to the future of Uzbekistan in all spheres, to help women find their place in society and to pursue their careers, to create their own future with their own hands.

In this conversation, G. Khamdamova, Head of the State Water Cadastre Department of the Water Cadastre and Meteorological Measurements Department of the Hydrometeorological Service of the Republic of Uzbekistan, spoke about the ongoing reforms in water management, women scientists working in this field. She told the girls that they should always strive only for the future, to work in any field of their choice, to build a new Uzbekistan together with other young people. From this interview, the girls received great motivation, they said they will continue to learn in high spirits and will become mature professionals and active scientists in the future.
