

Mobility lesson based on 5+1 project

On October 23, 2021, associate Professor of "E and WRM" M. Abdukadirova together with Head of "Tashkent city water supply" LLC M.Abbosxonov and leading researcher J.Durkhadjaev organized mobile training for 4th-year students of group 406 at the Salar Sewage Treatment Plant.

The experts answered the question of the students. In order to protect water basins and the environment, and to solve the problem of water scarcity, they got an idea of the sewage system, which includes physicochemical and biological facilities for sewage and sewage treatment and sewage treatment.
