

## The tradition continues

The reforms carried out in the field of education in our country are reflected in our institute. As a result of consistent work carried out under the leadership of our esteemed rector Umurzakov Uktam Pardaevich, this year, for the first time in the history of our institute, three students won prizes in the subject "Hydraulics". The organization of online education in the context of a pandemic, the effective use of the MOODLE system, and the training of students through the ZOOM program gave their results. The staff of our institute, teachers of the Department of Hydraulics and Hydroinformatics took an active part in conducting online classes. In particular, hydraulics classes conducted through the UZREPORT channel gave their results. According to the results of the conducted work, the students of the Faculty of Hydromelioration Zhalilov Sirozhiddin took the 1st place, Turgunova Humora - the 2nd place, Zhuraboev Ismoilzhon - the 3rd place. We congratulate all employees of the institute on this victory, especially the faculty of the Department of Hydraulics and Hydroinformatics!
