

## Discussion with professors and teachers

As the role of the mutual exchange of ideas and exchanges of experience is great, so is the role of building skills and competencies. The increase in the social prestige and status of the teacher is, in fact, the same. For young professors and teachers of the Karshi branch of TIAME, Dean of the Faculty of Energy Supply of TIAME, Ph.D., Professor Isakov Abdusaid Jalilovich organized a round table discussion on "The role of professors and teachers in raising the rating of higher education institutions." During the meeting, Prof. A.J. Isakov explained in detail exactly what aspects teachers should pay attention to in the educational process, methodological and scientific activities. According to the rules of quarantine, the meeting, which was held at a social distance, was very meaningful and it was agreed to work together in a "teacher-student" system.
