

A memorable visit

Nowadays it is important to educate the younger generation in the spirit of love for the Motherland and to immortalize the memory of our ancestors who sacrificed their lives for the independence of our country, the freedom of our people and the peaceful life of future generations. First-year students of "Mechanization of hydromeliorative works" faculty, under the guidance of group curators visited the State Museum "Memory of Victims of Repression" under the Cabinet of Ministers.

During the visit, the museum's researchers made presentations on the construction and historical significance of the "Shahidlar xotirasi" Memorial Complex and the State Museum of Repression Victims.
