

Bravery is immortal deed

Under the guidance of Associate Professor of the department of "Irrigation and Melioration" Adkham Mamataliev, the students of group 202 of "Hydromelioration" faculty visited "Jasorat" monumental complex. The monument "Jasorat" was opened in 1970 in connection with the earthquake in Tashkent on April 26, 1966. On the back of the sculpture there are seven sidewalks in the city of Tashkent after the earthquake, which was reflected in the support of sister republics. This monument, on the one hand, reflects the courage of our people in the difficult times, and on the other hand, the example of the peoples' friendship. This visit made a great impression on the students. These impressions play a crucial role in their being courageous, brave and strong.
