

Scientific article on topic "The role of reading in the education of a harmoniously developed generation."

Rano Kodirova, Chairwoman of the Women's Council of the Faculty of Organization and Management of Water Resources, published a scientific article in the newspaper "Ma'rifat va Talim" on "The role of reading in the upbringing of harmoniously developed generation." In her article, Kodirova seeks to inspire young people to love reading books, and reports that the President of our Republic pays great attention to the future of youth. There is no doubt that Kodirova's article will encourage young people to love reading books.
