

Event at the student dormitory

The appeal is a valuable guide for dealing with the issues affecting all sectors of the national economy. It states what needs to pay more attention to the welfare of the people and the development of the country. I cannot imagine the progress of society without science and education. That is why the President did not propose to name the year as "The development of science and digital economy."

The professors and teachers of the Department of Humanities held a roundtable discussion with students living in 2 dormitory. The professors taught the students that the steps they take today would depend on who they are and what their future life is. The tradition of Teacher Discipline is not only about teaching but also about a concern for the maturity of the disciples. Such meetings help to strengthen the bonds between students and teachers and increase their sense of belonging to the fate of the country.
