

## Scientific and practical discussions are important factor in production.

A group of professors and teachers of the Institute, including: Rakhmatov N.R, Muratov A.R, Sharipov Z.Sh., Matyakubov B.Sh., Ibraimov A., Ikramov N.M, Abdisamatov O.S, Otakhonov M. and representatives of the Ministry of Water Resources, RIIWP staff visited Jizzakh and Syrdarya regions on August 27-29, 2021 in order to ensure the implementation of the Decree of the President of the Republic of Uzbekistan dated August 11, 2020 No PP-4801. Consequently, the following activities were carried out:

1. Construction and reconstruction of irrigation and land reclamation facilities in 2020-2021 were introduced

2. Shortcomings in the construction and reconstruction of irrigation and land reclamation facilities were identified and agreed to be addressed in the future.

3. Experience with specialists of local operating organizations (technicians and technologists), project organization specialists and heads of "Syrdaryosuvqurilishinvest" DM and "Jizzakhsuvqurilishinvest" DM on scientific conclusion on construction and reconstruction, restoration and monitoring of irrigation and land reclamation facilities in 2022 exchanged.

The management of "Syrdaryosuvqurilishinvest" and "Jizzakhsuvqurilishinvest" gave a brief report on the work done in 2020-2021. At the same time, they touched upon their current issues of concern.

1. Lack of clear guidelines on the amount of money allocated for the work of the excavator in 1 hour for irrigation and land reclamation.

2. The absence of protection zones for engineering works in the canal and ditch networks, on the other hand, it was noted that the root system of trees planted around the canal poses great problems in the implementation of engineering works. It was stressed that the ministry staff should help in this regard. In general, the scope of work to be carried out by the faculty of the Institute on the basic principles of quality construction and reconstruction of irrigation and land reclamation facilities, rehabilitation and monitoring and scientific conclusions was once again agreed.
