

Young Scientists School

The prosperity of science is one of the priority aspects of government. At present time a particular attention is paid to the scientific and educational potential of the country. The involvement of gifted and skilled young people in science is the guarantee of the development of our independent Republic and the complete realization of its scientific potential. ❌

The scientific-practical conference named "Current challenges in the sphere of agriculture and water management" was organized at the Faculty of Energy Supply of Agriculture and Water Resources, where students actively participated at the competition, devoted to the "The best scholarly research paper" in which a number of students, masters and young scientists took part.

At this traditional scientific-practical conference participated the dean of the faculty A. Isakov, the head of the department D. Kadirov, A. Turdiboev and a plenty of students from different faculties. The following awards were announced to the winners: S. Parpieva- 4th year student of group 409, Nurimbetova G-1st year student of group 111, B. Komilzhonov-3rd year student of group 5, master's student Sh. Rakhmonov and an assistant A. Nigmatov. The participants were impressed by high results of winners.
