

## Danger to the whole humanity

The problem of AIDS is a serious blow to society and the nation's development and worries the world's countries. Millions of people die in the world in premature death. It is very hard to recover those abusive diseases. In order to prevent such diseases among students, today in the lecture hall of the Faculty of "Land Management" was held the event dean of the faculty Sh.Narbaev and dean of the faculty on youth affairs Kh. Eshova. The doctor of the Tashkent City Center of AIDS N.T.Umarova gave a lecture to students on the subject.

She has provided students with clear, full-fledged information on AIDS infection prevention, and providing evidence of drug abuse and its negative consequences. At the end of the event, the students answered the questions raised by the students, in a clear and cautious manner. After that the Deputy Dean Kh. Eshova completed the event, expressing gratitude to all participants of the event.

**Report by Kh.Eshova, a deputy dean of the faculty**
