

## The end of the 1st stage of Olympiad

President Sh.Mirziyoyev says that in all his meetings, we should consider the issue of training comprehensively advanced specialists in the Republic of Uzbekistan. The Science Olympiads also have their place in the training of such personnel. Taking this into account, the teachers of the department "Theoretical and Constructive Mechanics" teach the students with devotion to the subjects taught in the department. Students of our institute participate annually in the Republic Olympiads and contribute to the growth of our institution. From March 28 to March 29, 2019, professors and teachers of the department prepared the students who are actively involved in science, and the department of "Theoretical and constructive mechanics" held the first Olympiad on "Constructive Mechanics". 12 students from "Hydraulic engineering" and "Hydromelioration" faculties participated in it.

The Olympiad was held according to all requirements. The following students got the highest scores according to the results of 4 rounds:

1. Tursunov Mirkamol Kimsanboy o'g'li - the 1st place with 328 ball (group 302 of HTC) supervisor senior teacher B.Urinov.
2. Muminov Jakhongir Dilshodovich - the 2nd place with 265 ball (group 306 og HTC) supervisor senior teacher E.Toshmatov.
3. Qorakhonov Shakhridin Abdulla o'g'li- the 3rd place with 192 ball (a 3-year students of HM) supervisor senior teacher B. Urinov.

**Report by M.Mirsaidov, the head of the department**

**R.Jumaniyozov, the press secretary of the institute**
