

Seeing the Museum is a non-traditional form of teaching

The museum has great educational potential, selecting events, facts, human destinies through the documentation function. Interactivity is the main methodological device in the work of the modern museum, when it ceases to be only a repository, and becomes a living organism in the process of cognition. 1st-year students of the group 105 of the extramural department of the Water Management and Melioration, together with the group's curator and teacher of the Department of Exploitation of Irrigation and Drainage Systems A.I.Gafarova, visited the Amir Temur Museum.
